

Every step counts.

What is 10,000 Steps?

The 10,000 Steps Program is an evidence-based, physical activity initiative delivered by the team at CQUniversity Australia. Physical activity has many health benefits for hearts, bodies and minds. Use a step tracker to find out how much you move each day and set a daily goal that suits you. Our team can help you get started!

10,000 Steps is a free program to support and motivate you to be more active every day.

Set yourself a daily step goal

Find ways to move more each day

Sync steps from your activity tracker

Monitor your step statistics

Connect with Friends and Family

Join monthly step Challenges

Take the first step

Start stepping towards a healthier, happier you by downloading our **FREE** 10,000 Steps app.

- Add steps and minutes of activity
- Sync steps from Apple Health and Health Connect
- See progress towards your daily goal
- View your steps graphs and statistics
